SUMMARY

Computer Science student (3.575 GPA) building C++ applications for real-world problem solving, including data persistence, algorithmic optimization, and user-driven logic. 8+ years leading high-volume logistics operations. Seeking entry-level Software Engineering role.

PROJECTS

Galaxy's Edge Ride Planner (C++)

- Command-line app simulating Disneyland ride planning with dynamic optimization
- Priority-based sorting and time-of-day strategies (morning/afternoon/evening)
- File I/O to persist ride data (structured text storage)
- Optimizes ride order by wait time and user preferences

Budget Tracker (C++)

- Console app to track and categorize expenses
- File-based storage for saving/loading data
- Calculates totals and analyzes spending by category
- Emphasis on clean data structures and efficient I/O

TECHNICAL SKILLS

C++, Python, Java, SQL | Data Structures, Algorithms, OOP, File I/O | Git, GitHub, Visual Studio

EXPERIENCE

Tyson Foods — Warehouse Supervisor (Mar 2025 – Present)

- Lead high-volume distribution operations ensuring accuracy and efficiency
- Manage team performance, safety compliance, and KPIs
- Drive process improvements to increase throughput and reduce errors

Tyson Foods — Operations Administrator (Aug 2021 – Mar 2025)

- Improved workflow efficiency by 20% via data-driven optimization
- Reduced costs by 15% by identifying inefficiencies
- Managed scheduling, inventory systems, and cross-functional coordination

FedEx Ground — Operations Manager / HAZMAT Specialist (Dec 2017 – Jan 2021)

- Reduced sorting/handling errors by 30% through process improvements
- Led safety compliance and HAZMAT operations
- Trained and developed employees in high-pressure environments

EDUCATION

Southern New Hampshire University — B.S. Computer Science (In Progress)
